EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, line 2, after "2000" , the following has been inserted:

-- now US Patent no. 6,652,935 -- .

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest laminated glass containers comprising an inner layer and an outer layer of glass wherein the layers are glasses having redox numbers that differ by at least 20. Likewise, the prior art does not teach laminated glass containers having an amber glass layer and a flint glass layer (amber glass and flint glass being adequately defined in the applicant's specification). While prior art examples of laminated glass containers exist, none of those examples include the use of glasses differing in redox number by at least 20. As defined by the applicant's specification, amber glass and flint glass were known to have different redox numbers. It would not have been obvious to make the casing and core glasses of the prior art examples different redox numbers because a person of ordinary skill in the art would have expected the glasses to react and weaken the glass container at the interface between the different glasses.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
